

# ARE YOU PREPARED TO HELP YOUR CLIENTS BUY OR SELL A GREEN HOME?

Build It Green's real estate trainings teach you everything you need to know to help your clients understand green features, make cost-saving decisions, and navigate statewide rebate programs.

## Certified Green Real Estate Professional Training

Feb 1 - 2, 2012 | San Francisco | Only \$50\*

Feb 16 - 17, 2012 | North Bay Association of Realtors, Santa Rosa | Only \$50\*

A comprehensive 2-day course that helps you be your clients' go-to resource for energy efficiency rebates, green lending practices, and credible green building standards.

We'll show you how to take an affordable home and add green and energy efficiency upgrades that reduce utility and maintenance costs. Rebates, incentives and financing offset the cost of the initial upgrades, so your clients can get a better home for less!

You'll learn about California specific disclosure regulations, mortgage options and lending programs (203K, Energy Efficiency Mortgages). With this certification you'll also be listed on Build It Green's directory of green professionals.

*\*Regularly \$450, this course has been discounted to only \$50 thanks to the generous support of Energy Upgrade California!*

## Rebates are making green upgrades more affordable.

Energy Upgrade California in Alameda County is offering up to \$4000 in energy upgrade rebates and up to \$1000 in green label rebates to Alameda County homeowners. Real estate professionals can get a \$200 referral fee for any project they refer that results in a green label. Learn more about rebates at [GreenPointRated.com/Rebates](http://GreenPointRated.com/Rebates).
